**MDX-R3 VGB Compliant Debris Drain**

MDX-R3 is a highly efficient drain that allows dirt, leaves, and other debris to be effectively removed from your pool.

**SDX High Flow Safety Drain**

MDX-R3 also offers multiple layers of protection, including the VGB 2008 Compliant SDX High Flow Safety Drain®. If the MDX-R3 ever becomes blocked, the SDX absorbs the full flow of the pump to relieve excessive suction and provide a back-up layer of anti-entrapment safety.

**Debris Containment Canister (Optional)**

The MDX-R3 works in conjunction with the Paramount Debris Containment Canister which holds 400% more than most pool pump baskets, and is easy to access through a color coordinated deck lid. An additional layer of safety can be achieved with the optional MVFUSE Magnetic Safety Vacuum Release System (SVRS).

**WARNING:** MDX-R3 and SDX must be installed in accordance with Paramount’s written instruction manual, and in conformity with applicable Federal, State, Local and Swimming pool industry building and safety codes.

* MDX/R3 VGB Compliant Debris Drain is only available to Paramount Authorized Builders
